

General information

The Lekkerkerk oil field was discovered in 1959 by NAM. The field contains oil in (stacked) reservoirs of the Delfland Subgroup. The oil field is situated 15 km's east of Rotterdam, on the boundary of the West Netherlands Basin and the Roer Valley Graben. The field is tested at several reservoir levels in de Delfland Subgroup. The field is not producing and currently situated in the Rijswijk concession of NAM.

Regional information on the geology, including sedimentology and the structural configuration, of the area is available in map sheet VII-VIII Noordwijk-Rotterdam, Amsterdam-Gorinchem.

Sequence of events

Date	Event
03-01-1955	Production license Rijswijk granted (NAM)
20-03-1957	Production license area expanded with ca 1900 km ² (NAM)
22-09-1959	Spud date Lekkerkerk-01
28-10-1959	TD reached (1965 m ah)
02-11-1959 / 05-04-1960	DST's (1454.0-1006.2 m ah)
07-06-1979	Production license area expanded with ca 25 km ² (NAM)
