## Fact sheet Q13-FC field

### Stranded fields - Q4 2009

Location map of the Q13-FC field

## **General information**

The Q13-FC gas field was discovered in 1988 with exploration well Q13-06. The gas is contained in the Zechstein Fringe Sandstone (ZEFRS). The field has not been developed. An application is filed for the Q13 block by Delta Hydrocarbons, the block in which the field is located.
